PROFESSIONAL EXPERIENCE

Full Stack Developer Intern, *TiniTec*

- Collaborated in designing and developing new web application features using PHP and JavaScript, ensuring clean and maintainable code
- Engineered **responsive, ergonomic, and cross-browser compatible** user interfaces adhering to modern responsive design principles
- Maintained application **stability, security, and performance** by proactively debugging and troubleshooting issues
- Diagnosed and resolved application anomalies and bugs
- Participation in code review, by providing constructive feedbacks
- Deploy application to production environments

Key Projects:

- **Email Web App:** Integrated **AI-powered summarization** and **text generation** features with subscription plan management
- **Landing Page + Admin Panel:** Built a dynamic landing page fully managed from a **custom admin dashboard**
- **Multi-step Form + PDF Generator:** Developed an interactive client form that automatically generated **PDF reports**
- **Internal Management Tool:** Created an internal app for managing **leave requests, equipment tracking, and intern records**

PROJECTS

Midwink

A web-based email platform inspired by Gmail, featuring **AI-powered summarization** and **email generation** based on user prompts

Contributions:

- Implemented **AI summarization** and **text generation** using modern NLP models
- Developed core **email functionalities** such as sending, replying, forwarding, archiving, and starring messages
- Integrated **subscription management** with **Paddle** for payment processing
- Enhanced UI/UX for a seamless Gmail-like experience

SNRV

A dynamic **landing page and content management system** built for a **government company**, allowing administrators to manage all website data from a centralized dashboard

Contributions:

- Developed a **custom multi-language admin panel** using **Filament (Laravel)** for complete control over website content — including titles, text, images, services, products, and organizational units
- Displayed and dynamically rendered data on the **frontend** based on admin updates

SKILLS

- Proficiency in PHP, JavaScript and TypeScript
 - Strong experience with backend frameworks like Laravel, Node.js and Express.js
 - Proficiency in HTML, CSS and TailwindCSS
 - Building and designing responsive web interfaces using modern frontend frameworks like: Vue.js, React and Nuxt.js
 - Manage SQL databases (PostgreSQL, MySQL), and NoSQL (MongoDB)
 - Integrating and Developing RESTful and GraphQL APIs
 - Version controlling with Git and Github
 - Experience with queues, jobs and caching
 - Containerization with Docker
 - Hands-on experience with CMS framework (Hygraph.js)
-
- Ability to work independently and collaboratively
 - Time management and organizational skills
 - Problem-solving and critical thinking
 - Effective communication with cross-functional teams

EDUCATION

Master's Radio Mobile Network, *Sciences and Technology University Houari Boumediene*

Bachelor's Telecommunication Engineering, *Sciences and Technology University Houari Boumediene*
